Clinical Trials Office Unit (CTO)

Service Provider for Investigator Initiated Cancer Trials

Karolinska Institutet

KAROLINSKA UNIVERSITY HOSPITAL

Karolinska Comprehensive Cancer Center

Department of Clinical Cancer Studies

Karolinska Institutet | KAROLINSKA UNIVERSITETSSJUKHUSET

Karolinska Comprehensive Cancer Center

Head of Department
Kristina Sonnevi

Medical Lead
Luigi De Petris - Oncology
Maria Creignou- Hematology

Economic controller

Cancer Study Unit

Solna
Johanna Vernersson
(Head of Unit)

Coordination of cancer trials in Solna

24 Research Nurses
6 Sample coordinators

Huddinge
Sofie Sibia
(Head of Unit)

Coordination of Cancer trials in Huddinge

16 Research Nurses
8 Sample coordinators

Clinical Trials Office

Semra Öz
(Head of Unit)

Office for academic sponsor trials

11 Clinical Research Managers (CRM) incl Datamanager

Phase 1 Unit

Solna
Caroline Brav
(Head of Unit)

FiH/Phase 1-trials in Solna
8 Research Nurses
2 Sample coordinators

Huddinge
Sofie Sibia
(Head of Unit)

FiH/Phase 1 cancer and non-cancer diagnosis & healthy volunteers
4 Research Nurses
1 Sample coordinators

6 Phase 1-Investigators (3 FTE)

Clinical Trials Office

Unit & Function

Est: 2002

Unit

- Unit within Karolinska University Hospital supporting non-commercial, academic clinical drug trials and studies.
- Over 20 years of experience supporting investigators and researchers at Karolinska and Karolinska Institutet
- Also provides assistance to other hospitals when resources allow

Scope and Function

- Comprehensive support for clinical trials: regulatory, project, monitoring, data, and safety services
- Expertise across multiple therapeutic areas – oncology, hematology, neurology, pediatrics, and more
- Supports studies in all phases (I–IV), projects including First-in-Human and advanced cell therapy studies ATMP
- National and international projects

KCTO Clinical Trials Office

Karolinska Institutet | KAROLINSKA UNIVERSITETSSJUKHUSET

Karolinska Comprehensive Cancer Center

Clinical Trials Office

Service Provider

- Study Protocols – Design, writing, and consent documentation. In an advisory capacity helping with study design
- Regulatory Support – Applications via CTIS (MPA & Ethics Authority)
- Project Management – Agreements, meetings, documentation, TMF
- Monitoring – GCP-compliant, on-site (Sweden) or remote
- Data Management – Database setup, collection, analysis
- Safety Reporting – Adverse events & ASR preparation
- Training & Regulatory Advisory – For managers and research support units at Karolinska
- Assist in developing the study budget when applying for grants
- Responsible for distributing site payments according to the criteria established for data entry

Clinical Trials Office

Competence & Capabilities

- Diverse, expert Clinical Trial Managers
  Backgrounds: Biomedicine (PhD), Molecular Biology (PhD), Chemistry (PhD), Pharmacy, Nursing (lic), Data Management
- Complementary expertise
- Trial Managers also serve as Monitors
- Close collaboration with Sponsor representative & Research group
- Ensures regulatory compliance and oversight
- Single point of contact for studies
- Coordination of contracts, legal, and financial matters
- Broad expertise across therapeutic areas
- Experience across a broad range of early clinical trials
  - Complex immunotherapy
  - Vaccines
  - Small molecules
  - PET-tracers and PET-ligands
  - ATMP
  - TCR, CAR-T, adoptive T-cell therapy

Budgeting for a Clinical Study

- Budgeting for a clinical study — a key factor for both feasibility and success

Karolinska Institutet

KAROLINSKA UNIVERSITETSSJUKHUSET

Karolinska Comprehensive Cancer Center

Why budgeting matters

- Ensures feasibility and study completion
- Prevents delays and interruptions
- Supports high-quality data
- Reduces financial risk

Underestimating costs is a common cause of study failure

Karolinska Institutet | KAROLINSKA UNIVERSITETSSJUKHUSET

Karolinska Comprehensive Cancer Center

When to start budgeting

- During study design
- While drafting the protocol
- When exploring funding

Budget and protocol must be aligned

Karolinska Institutet | KAROLINSKA UNIVERSITETSSJUKHUSET

Karolinska Comprehensive Cancer Center

Main cost categories

- Personnel (*investigators, study nurses, coordinatorns, data manager, biostatician*)

- Study procedures (*lab test, imaging, investigational product*)

- Administrative costs (*application fees, GCP monitoring, datasystems, licens fee)*

Karolinska Institutet | KAROLINSKA UNIVERSITETSSJUKHUSET

Karolinska Comprehensive Cancer Center

Hidden and underestimated cost

- Recruitment

(*reimbursment to trial site per included patient incl CT/DT, blood samples)*

- Staff training
- Monitoring & audits
- Central lab analysis / Translational analysis
- Data storage & archiving
- Insurance

Karolinska Institutet | KAROLINSKA UNIVERSITETSSJUKHUSET

Karolinska Comprehensive Cancer Center

Small recurring costs accumulate

International studies

- Monitoring across countries
- Travel & coordination
- Regulatory applications
- Country-specific fees (e.g., Denmark annual fee)

Higher complexity and cost

Karolinska Institutet | KAROLINSKA UNIVERSITETSSJUKHUSET

Karolinska Comprehensive Cancer Center

Site-specific and overhead considerations

- Costs vary by department and infrastructures
- Infrastructure differences
- Overhead: KI ~24%, Karolinska ~15%

Overhead must be included early to avoid gaps.

Study drug & pharmacy

- Drug cost
- Preparation & storage
- Pharmacy handling
- Pharmacy agreements
- Drug distribution across country/countries (Tamro, Oriola)

Each site needs a pharmacy agreement in drug trials

Karolinska Institutet

KAROLINSKA UNIVERSITETSSJUKHUSET

Karolinska Comprehensive Cancer Center

Funding sources in academic trials

- Research grants

Sjöbergsstiftelsen, Vetenskapsrådet, Cancerfonden, Barncancerfonden, Radiumhemmetsforskningsfonder

- Industry collaborations
- Internal funding

Many funders require annual financial reporting

Karolinska Institutet | KAROLINSKA UNIVERSITETSSJUKHUSET

Karolinska Comprehensive Cancer Center

Common challanges

- Underestimating time and workload
- Hidden costs
- Slow recruitment
- Protocol amendments

Flexibility and continuous follow-up are important

Karolinska Institutet | KAROLINSKA UNIVERSITETSSJUKHUSET

Karolinska Comprehensive Cancer Center

Role of Clinical Trials Office

- Budget planning & financial management
- Contract management
- Reimbursement to trial units per included patient
- Pharmacy agreements & invoices
- Build flexibility into the budget

Supporting the sponsor throughout the study

Karolinska Institutet

KAROLINSKA UNIVERSITETSSJUKHUSET

Karolinska Comprehensive Cancer Center

Key take aways

- Start early
- Align the budget with study design
- Include all cost categories- hidden & international costs
- Plan for overhead & pharmacy

Follow the budget continuously
